

Geography: Vision

Within the Geography curriculum at Throstion Primary School we aim to equip the children with the knowledge and skills that will help them understand the world around them.

It is our intent to inspire the children with a curiosity and fascination about diverse places and people that will remain with them for the rest of their lives.

Through this we aim to develop geographical skills, that range from collecting and analysing data, using maps and atlases, globes, aerial photographs and digital mapping that will help them name and locate countries, continents and oceans.

It is our aim to make the children more confident with different aspects of geography and ultimately to learn to enjoy and love the subject both inside and outside the classroom.
