

# **Supporting Pupils with Medical Conditions Policy**

# Date Policy Agreed by the Full Governing Body:

Monday 6<sup>th</sup> October 2025

**Date of Next Review:** 

October 2026

#### **Contents:**

#### Statement of intent

- 1. Legal framework
- 2. Roles and responsibilities
- 3. Admissions
- 4. Notification procedure
- 5. Staff training and support
- 6. Self-management
- 7. IHCPs
- 8. Managing medicines
- 9. Allergens, anaphylaxis and adrenaline auto-injectors (AAIs)
- 10. Record keeping
- 11. Emergency procedures
- 12. Day trips, residential visits and sporting activities
- 13. Unacceptable practice
- 14. Liability and indemnity
- 15. Complaints
- 16. <u>Home-to-school transport</u>
- 17. Defibrillators
- 18. Monitoring and review

#### **Appendices**

- A. <u>Individual Healthcare Plan Implementation Procedure</u>
- B. Individual Healthcare Plan
- C. Parental Agreement for the School to Administer Medicine
- D. Record of Medicine Administered to an Individual Pupil
- E. Record of All Medicine Administered to Pupils
- F. Model letter inviting parents to contribute to individual healthcare plan development
- G. Contacting Emergency Services

#### Statement of intent

The governing body of Throston Primary School has a duty to ensure arrangements are in place to support pupils with medical conditions. The aim of this policy is to ensure that all pupils with medical conditions, in terms of both physical and mental health, receive appropriate support to allow them to play a full and active role in school life, remain healthy, have full access to education (including educational visits and PE), and achieve their academic potential.

The school believes it is important that parents of pupils with medical conditions feel confident that the school provides effective support for their children's medical conditions, and that pupils feel safe in the school environment.

Some pupils with medical conditions may be classed as disabled under the definition set out in the Equality Act 2010. The school has a duty to comply with the Act in all such cases.

In addition, some pupils with medical conditions may also have SEND and have an EHC plan collating their health, social and SEND provision. For these pupils, the school's compliance with the DfE's 'Special educational needs and disability code of practice: 0 to 25 years' and the school's Special Educational Needs and Disabilities (SEND) Policy will ensure compliance with legal duties.

To ensure that the needs of our pupils with medical conditions are fully understood and effectively supported, we consult with health and social care professionals, pupils and their parents/carers.

#### 1. Legal framework

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Children and Families Act 2014
- Education Act 2002
- Education Act 1996 (as amended)
- Children Act 1989
- National Health Service Act 2006 (as amended)
- Equality Act 2010
- Health and Safety at Work etc. Act 1974
- Misuse of Drugs Act 1971
- Medicines Act 1968
- The School Premises (England) Regulations 2012 (as amended)
- The Special Educational Needs and Disability Regulations 2014 (as amended)
- The Human Medicines (Amendment) Regulations 2017
- The Food Information (Amendment) (England) Regulations 2019 (Natasha's Law)
- DfE (2015) 'Special educational needs and disability code of practice: 0-25 years'
- DfE (2021) 'School Admissions Code'
- DfE (2017) 'Supporting pupils at school with medical conditions'
- DfE (2022) 'First aid in schools, early years and further education'
- Department of Health (2017) 'Guidance on the use of adrenaline auto-injectors in schools'

This policy operates in conjunction with the following school policies:

- Special Educational Needs and Disabilities (SEND) Policy
- Complaints Procedures Policy
- Equality Objectives
- Attendance and Absence Policy
- Admissions Policy

# 2. Roles and responsibilities

The governing body will be responsible for:

- Reviewing this policy alongside the headteacher and school nurse.
- Ensuring that this policy is readily accessible to parents and school staff.
- Fulfilling its statutory duties under legislation.
- Ensuring that arrangements are in place to support pupils with medical conditions.
- Ensuring that pupils with medical conditions can access and enjoy the same opportunities as any other pupil at the school.
- Working with the local authority (LA), health professionals, commissioners and support services to ensure that pupils with medical conditions receive a full education.
- Ensuring that, following long-term or frequent absence, pupils with medical conditions are reintegrated effectively.
- Ensuring that the focus is on the needs of each pupil and what support is required to support their individual needs.
- Instilling confidence in parents and pupils in the school's ability to provide effective support.
- Ensuring that all members of staff are properly trained to provide the necessary support and are able to access information and other teaching support materials as needed.

- Ensuring that no prospective pupils are denied admission to the school because arrangements for their medical conditions have not been made.
- Ensuring that pupils' health is not put at unnecessary risk. As a result, the board holds the right to not accept a pupil into school at times where it would be detrimental to the health of that pupil or others to do so, such as where the child has an infectious disease.
- Ensuring that policies, plans, procedures and systems are properly and effectively implemented.
- Ensuring that the school's policy clearly identifies the roles and responsibilities of all those involved in the arrangements they make to support pupils and sets out the procedures to be followed whenever a school is notified that a pupil has a medical condition.
- Ensuring that the school's policy covers the role of individual healthcare plans, and who is responsible for their development, in supporting pupils at school with medical conditions.
- Ensuring that plans are reviewed at least annually, or earlier if evidence is presented that the child's needs have changed.

#### The headteacher will be responsible for:

- Reviewing this policy alongside the governing board and school nurse.
- The overall implementation of this policy.
- Ensuring that this policy is effectively implemented with stakeholders.
- Ensuring that all staff are aware of this policy and understand their role in its implementation.
- Ensuring that all staff who need to know are aware of the child's condition.
- Ensuring that a sufficient number of staff are trained and available to implement this policy and deliver against all individual healthcare plans (IHCPs), including in emergency situations.
- Considering recruitment needs for the specific purpose of ensuring pupils with medical conditions are properly supported.
- Having overall responsibility for the development of IHCPs.
- Ensuring that staff are appropriately insured and aware of the insurance arrangements.

#### Parents will be responsible for:

- Notifying the school if their child has a medical condition.
- Providing the school with sufficient and up-to-date information about their child's medical needs.
- Being involved in the development and review of their child's IHCP.
- Carrying out any agreed actions contained in the IHCP.
- Ensuring that they, or another nominated adult, are contactable at all times.

#### Pupils will be responsible for:

- Being fully involved in discussions about their medical support needs, where applicable.
- Contributing to the development of their IHCP, if they have one, where applicable.
- Being sensitive to the needs of pupils with medical conditions.

#### School staff will be responsible for:

- Providing support to pupils with medical conditions, where requested, including the administering of medicines, but are not required to do so.
- Taking into account the needs of pupils with medical conditions in their lessons when deciding whether or not to volunteer to administer medication.
- Receiving sufficient training and achieve the required level of competency before taking responsibility for supporting pupils with medical conditions.

 Knowing what to do and responding accordingly when they become aware that a pupil with a medical condition needs help.

Clinical commissioning groups (CCGs) will be responsible for:

- Ensuring that commissioning is responsive to pupils' needs, and that health services are able to cooperate with schools supporting pupils with medical conditions.
- Making joint commissioning arrangements for EHC provision for pupils with SEND.
- Being responsive to LAs and schools looking to improve links between health services and schools.
- Providing clinical support for pupils who have long-term conditions and disabilities.
- Ensuring that commissioning arrangements provide the necessary ongoing support essential to ensuring the safety of vulnerable pupils.

Other healthcare professionals, including GPs and paediatricians, are responsible for:

- Providing advice on developing IHCPs.
- Providing support in the school for children with particular conditions, e.g. asthma, diabetes and epilepsy, where required.

Providers of health services are responsible for cooperating with the school, including ensuring communication takes place, liaising with the school nurse and other healthcare professionals, and participating in local outreach training.

The LA will be responsible for:

- Commissioning school nurses for local schools.
- Promoting cooperation between relevant partners.
- Making joint commissioning arrangements for EHC provision for pupils with SEND.
- Providing support, advice, guidance, and suitable training for school staff, ensuring that IHCPs can be effectively delivered.
- Working with the school to ensure that pupils with medical conditions can attend school fulltime

Where a pupil is away from school for 15 days or more (whether consecutively or across a school year), the LA has a duty to make alternative arrangements, as the pupil is unlikely to receive a suitable education in a mainstream school.

#### 3. Admissions

Admissions will be managed in line with the school's Admissions Policy.

No child will be denied admission to the school or prevented from taking up a school place because arrangements for their medical condition have not been made; a child may only be refused admission if it would be detrimental to the health of the child to admit them into the school setting.

The school will not ask, or use any supplementary forms that ask, for details about a child's medical condition during the admission process.

## 4. Notification procedure

When the school is notified that a pupil has a medical condition that requires support in school, the school will arrange a meeting with parents, healthcare professionals and the pupil, with a view to discussing the necessity of an IHCP, outlined in detail in the IHCPs section of this policy.

The school will not wait for a formal diagnosis before providing support to pupils. Where a pupil's medical condition is unclear, or where there is a difference of opinion concerning what support is required, a judgement will be made by the headteacher based on all available evidence, including medical evidence and consultation with parents.

For a pupil starting at the school in a September uptake, arrangements will be put in place prior to their introduction and informed by their previous institution. Where a pupil joins the school mid-term or a new diagnosis is received, arrangements will be put in place as soon as practically possible and within two weeks.

## 5. Staff training and support

Any staff member providing support to a pupil with medical conditions will receive suitable training. Staff will not undertake healthcare procedures or administer medication without appropriate training. A first-aid certificate will not constitute appropriate training for supporting pupils with medical conditions.

Through training, staff will have the requisite competency and confidence to support pupils with medical conditions and fulfil the requirements set out in IHCPs. Staff will understand the medical conditions they are asked to support, their implications, and any preventative measures that must be taken.

The school will identify suitable training opportunities that ensure all medical conditions affecting pupils in the school are fully understood, and that staff can recognise difficulties and act quickly in emergency situations.

Training will provided by the following bodies:

- Commercial training provider
- The parents of pupils with medical conditions
- Medical professionals involved with a child with a medical condition

The parents of pupils with medical conditions will be consulted for specific advice and their views are sought where necessary, but they will not be used as a sole trainer.

The governing body will provide details of further CPD opportunities for staff regarding supporting pupils with medical conditions.

Supply teachers will be:

- Provided with access to this policy.
- Informed of all relevant medical conditions of pupils in the class they are providing cover for.
- Covered under the school's insurance arrangements.

# 6. Self-management

Following discussion with parents, pupils who are competent to manage their own health needs and medicines will be encouraged to take responsibility for self-managing their medicines and procedures. This will be reflected in their IHCP.

Where possible, pupils will be allowed to carry their own medicines and relevant devices. Where it is not possible for pupils to carry their own medicines or devices, they will be held in suitable locations that can be accessed quickly and easily. If a pupil refuses to take medicine or carry out a necessary procedure, staff will not force them to do so. Instead, the procedure agreed in the pupil's IHCP will be followed. Following such an event, parents will be informed so that alternative options can be considered.

If a pupil with a controlled drug passes it to another child for use, this is an offence and appropriate disciplinary action will be taken in accordance with our Behaviour Policy.

#### 7. Individual Health Care Plans

The school, healthcare professionals and parents agree, based on evidence, whether an IHCP will be required for a pupil, or whether it would be inappropriate or disproportionate to their level of need. If no consensus can be reached, the headteacher will make the final decision.

The school, parents and a relevant healthcare professional will work in partnership to create and review IHCPs. Where appropriate, the pupil will also be involved in the process.

IHCPs will include the following information:

- The medical condition, along with its triggers, symptoms, signs and treatments
- The pupil's needs, including medication (dosages, side effects and storage), other treatments, facilities, equipment, access to food and drink (where this is used to manage a condition), dietary requirements, and environmental issues
- The support needed for the pupil's educational, social and emotional needs
- The level of support needed, including in emergencies
- Whether a child can self-manage their medication
- Who will provide the necessary support, including details of the expectations of the role and the training needs required, as well as who will confirm the supporting staff member's proficiency to carry out the role effectively
- Cover arrangements for when the named supporting staff member is unavailable
- Who needs to be made aware of the pupil's condition and the support required
- Arrangements for obtaining written permission from parents and the headteacher for medicine to be administered by school staff or self-administered by the pupil
- Separate arrangements or procedures required during educational visits and activities
- Where confidentiality issues are raised by the parents or pupil, the designated individual to be entrusted with information about the pupil's medical condition
- What to do in an emergency, including contact details and contingency arrangements

Where a pupil has an emergency healthcare plan prepared by their lead clinician, this will be used to inform the IHCP.

IHCPs will be easily accessible to those who need to refer to them, but confidentiality will be preserved. IHCPs will be reviewed on at least an annual basis, or when a child's medical circumstances change, whichever is sooner.

Where a pupil has an EHC plan, the IHCP will be linked to it or become part of it. Where a child has SEND but does not have a statement or EHC plan, their SEND will be mentioned in their IHCP where necessary.

Where a child is returning from a period of hospital education, alternative provision or home tuition, the school will work with the LA and education provider to ensure that their IHCP identifies the support the child will need to reintegrate.

# 8. Managing medicines

Medicines will only be administered at school when it would be detrimental to a pupil's health or school attendance not to do so.

Pupils under 16 years old will not be given prescription or non-prescription medicines without their parents' written consent, except where the medicine has been prescribed to the pupil without the parents' knowledge. In such cases, the school will encourage the pupil to involve their parents, while respecting their right to confidentially.

Non-prescription medicines may be administered in the following situations:

- When it would be detrimental to the pupil's health not to do so
- When instructed by a medical professional

No pupil under the age of 16 will be given medicine containing aspirin unless prescribed by a doctor. Pain relief medicines will not be administered without first checking when the previous dose was taken, and the maximum dosage allowed.

Parents will be informed any time medication is administered that is not agreed in an IHCP.

The school will only accept medicines that are in-date, labelled, in their original container, and contain instructions for administration, dosage and storage. The only exception to this is insulin, which must still be in-date, but is available in an insulin pen or pump, rather than its original container.

All medicines will be stored safely. Pupils will be informed where their medicines are at all times and will be able to access them immediately, whether in school or attending an educational or residential visit. Where relevant, pupils will be informed of who holds the key to the relevant storage facility. When medicines are no longer required, they will be returned to parents for safe disposal. Sharps boxes will be used for the disposal of needles and other sharps.

Controlled drugs will be stored in a non-portable container and only named staff members will have access; however, these drugs can be easily accessed in an emergency. A record will be kept of the amount of controlled drugs held and any doses administered. Staff may administer a controlled drug to a pupil for whom it has been prescribed, in accordance with the prescriber's instructions. The school will hold asthma inhalers for emergency use. The inhalers will be stored in the school office and their use will be recorded.

Records will be kept of all medicines administered to individual pupils, stating what, how and how much medicine was administered, when, and by whom. A record of side effects presented will also be held.

Before administering medication, the responsible member of staff should check:

- The pupil's identity.
- That the school possesses written consent from a parent.
- That the medication name, dosage and instructions for use match the details on the consent form.
- That the name on the medication label is the name of the pupil being given the medication.
- That the medication to be given is within its expiry date.
- That the pupil has not already been given the medication within the accepted frequency of dosage.

If there are any concerns surrounding giving medication to a pupil, the medication will not be administered and the school will consult with the pupil's parent or a healthcare professional, documenting any action taken.

If a pupil cannot receive medication in the method supplied, e.g. a capsule cannot be swallowed,

written instructions on how to administer the medication must be provided by the pupil's parent, following advice from a healthcare professional.

Where appropriate, pupils will be encouraged to self-administer under the supervision of a staff member, provided that parental consent for this has been obtained. If a pupil refuses to take their medication, staff will not force them to do so, but will follow the procedure agreed upon in their IHCPs, and parents will be informed so that alternative options can be considered.

The school will not be held responsible for any side effects that occur when medication is taken correctly.

#### Non-prescription medicines

The school is aware that pupils may, at some point, suffer from minor illnesses and ailments of a short-term nature, and that in these circumstances, health professionals are likely to advise parents to purchase over the counter medicines, for example, paracetamol and antihistamines.

The school works on the premise that parents have the prime responsibility for their child's health and should provide schools and settings with detailed information about their child's medical condition as and when any illness or ailment arises.

To support full attendance the school will consider making arrangements to facilitate the administration of non-prescription medicines following parental request and consent.

Pupils and parents will not be expected to obtain a prescription for over-the-counter medicines as this could impact on their attendance and adversely affect the availability of appointments with local health services due to the imposition of non-urgent appointments being made.

If a pupil is deemed too unwell to be in school, they will be advised to stay at home or parents will be contacted and asked to take them home.

When making arrangements for the administration of non-prescription medicines the school will exercise the same level of care and caution, following the same processes, protocols and procedures as those in place for the administration of prescription medicines.

The school will also ensure that the following requirements are met when agreeing to administer non-prescription medicines.

- Non-prescription medicines will not be administered for longer than is recommended. For
  example, most pain relief medicines, such as ibuprofen and paracetamol, will be
  recommended for three days use before medical advice should be sought. Aspirin will not be
  administered unless prescribed.
- Parents will be asked to bring the medicine in, on at least the first occasion, to enable the
  appropriate paperwork to be signed by the parent and for a check to be made of the
  medication details.
- Non-prescription medicines must be supplied in their original container, have instructions for administration, dosage and storage, and be in date. The name of the child can be written on the container by an adult if this helps with identification.

 Only authorised staff who are sufficiently trained will be able to administer non-prescription medicines.

#### **Paracetamol**

The school is aware that paracetamol is a common painkiller that is often used by adults and children to treat headaches, stomach ache, earache, cold symptoms, and to bring down a high temperature; however, it also understands that it can be dangerous if appropriate guidelines are not followed and recommended dosages are exceeded.

The school is aware that paracetamol for children is available as a syrup from the age of 2 months; and tablets (including soluble tablets) from the age of 6 years, both of which come in a range of strengths.

The school understands that children need to take a lower dose than adults, depending on their age and sometimes, weight. The school will ensure that authorised staff are fully trained and aware of the <a href="NHS advice">NHS advice</a> on how and when to give paracetamol to children, as well as the recommended dosages and strength.

Staff will always check instructions carefully every time they administer any medicine, whether prescribed or not, including paracetamol.

The school will ensure that they have sufficient members of staff who are appropriately trained to manage medicines and health needs as part of their duties.

The written consent of parents will be required in order to administer paracetamol to pupils.

# 9. Allergens, anaphylaxis and adrenaline auto-injectors (AAIs)

Parents are required to provide the school with up-to-date information relating to their children's allergies, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

The headteacher and catering team will ensure that all pre-packed foods for direct sale (PPDS) made on the school site meet the requirements of Natasha's Law, i.e. the product displays the name of the food and a full, up-to-date ingredients list with allergens emphasised, e.g. in bold, italics or a different colour.

The catering team will also work with any external catering providers to ensure all requirements are met and that PPDS is labelled in line with Natasha's Law.

**Tuck Shop:** On the school website there is a page which lists the limited range of healthy snacks for sale. The page also shows up-to-date ingredients list including allergens.

Staff members receive appropriate training and support relevant to their level of responsibility, in order to assist pupils with managing their allergies.

The administration of adrenaline auto-injectors (AAIs) and the treatment of anaphylaxis will be carried out in accordance with the school's Allergen and Anaphylaxis Policy. Where a pupil has been

prescribed an AAI, this will be written into their IHCP.

A Register of Adrenaline Auto-Injectors (AAIs) will be kept of all the pupils who have been prescribed an AAI to use in the event of anaphylaxis. A copy of this will be held in each classroom for easy access in the event of an allergic reaction and will be checked as part of initiating the emergency response. Prescribed AAI devices, will be stored in a suitably safe and central location.

Designated staff members will be trained on how to administer an AAI, and the sequence of events to follow when doing so. AAIs will only be administered by these staff members.

In the event of anaphylaxis, a designated staff member will be contacted. Where there is any delay in contacting designated staff members, or where delay could cause a fatality, the nearest staff member will administer the AAI. If necessary, other staff members may assist the designated staff members with administering AAIs, e.g. if the pupil needs restraining.

Where a pupil is, or appears to be, having a severe allergic reaction, the emergency services and the pupil's parents will be contacted. In the event of a school trip, pupils at risk of anaphylaxis will have their own AAI with them.

-

#### 10. Record keeping

Written records will be kept of all medicines administered to pupils. Proper record keeping will protect both staff and pupils, and provide evidence that agreed procedures have been followed. Appropriate forms for record keeping can be found in <u>Appendix D</u> and <u>Appendix E</u>.

## 11. Emergency procedures

Medical emergencies will be dealt with under the school's emergency procedures.

Where an IHCP is in place, it will detail:

- What constitutes an emergency.
- What to do in an emergency.

Pupils will be informed in general terms of what to do in an emergency, e.g. telling a teacher.

If a pupil needs to be taken to hospital, a member of staff will remain with the pupil until their parents arrive. When transporting pupils with medical conditions to medical facilities, staff members will be informed of the correct postcode and address for use in navigation systems.

## 12. Day trips, residential visits and sporting activities

Pupils with medical conditions will be supported to participate in educational visits, sporting activities and residential visits.

Prior to an activity taking place, the school will conduct a risk assessment to identify what reasonable adjustments should be taken to enable pupils with medical conditions to participate. In addition to a risk assessment, advice will be sought from pupils, parents and relevant medical professionals. The school will arrange for adjustments to be made for all pupils to participate, except where evidence from a clinician, e.g. a GP, indicates that this is not possible.

# 13. Unacceptable practice

The school will not:

• Assume that pupils with the same condition require the same treatment.

- Prevent pupils from easily accessing their inhalers and medication.
- Ignore the views of the pupil or their parents.
- Ignore medical evidence or opinion.
- Send pupils home frequently for reasons associated with their medical condition, or prevent them from taking part in activities at school, including lunch times, unless this is specified in their IHCP.
- Send an unwell pupil to the medical room or school office alone or with an unsuitable escort.
- Penalise pupils with medical conditions for their attendance record, where the absences relate to their condition.
- Make parents feel obliged or forced to visit the school to administer medication or provide medical support, including for toilet issues. The school will ensure that no parent is made to feel that they have to give up working because the school is unable to support their child's needs.
- Create barriers to pupils participating in school life, including educational visits.
- Refuse to allow pupils to eat, drink or use the toilet when they need to in order to manage their condition.

•

## 14. Liability and indemnity

The governing body will ensure that appropriate insurance is in place to cover staff providing support to pupils with medical conditions.

The school holds an insurance policy with Zurich Insurance Company Ltd. covering liability relating to the administration of medication.

All staff providing such support will be provided with access to the insurance policies. In the event of a claim alleging negligence by a member of staff, civil actions are most likely to be brought against the school, not the individual.

# 15. Complaints

Parents or pupils wishing to make a complaint concerning the support provided to pupils with medical conditions are required to speak to the school in the first instance. If they are not satisfied with the school's response, they may make a formal complaint via the school's complaints procedures, as outlined in the Complaints Procedures Policy. If the issue remains unresolved, the complainant has the right to make a formal complaint to the DfE.

Parents and pupils are free to take independent legal advice and bring formal proceedings if they consider they have legitimate grounds to do so.

# 16. Home-to-school transport

Arranging home-to-school transport for pupils with medical conditions is the responsibility of the LA. Where appropriate, the school will share relevant information to allow the LA to develop appropriate transport plans for pupils with life-threatening conditions.

#### 17. Defibrillators

The school has two <u>Mediana HeartOn A15</u> automated external defibrillators (AED). The AED will be stored in <u>the extended services entrance way</u> in a <u>secure</u> cabinet and in the main office in an unlocked

cupboard.

All staff members and pupils will be made aware of the AED's location and what to do in an emergency.

No training will be needed to use the AED, as voice and/or visual prompts guide the rescuer through the entire process from when the device is first switched on or opened; however, staff members will be trained in cardiopulmonary resuscitation (CPR), as this is an essential part of first-aid and AED use. The emergency services will always be called where an AED is used or requires using.

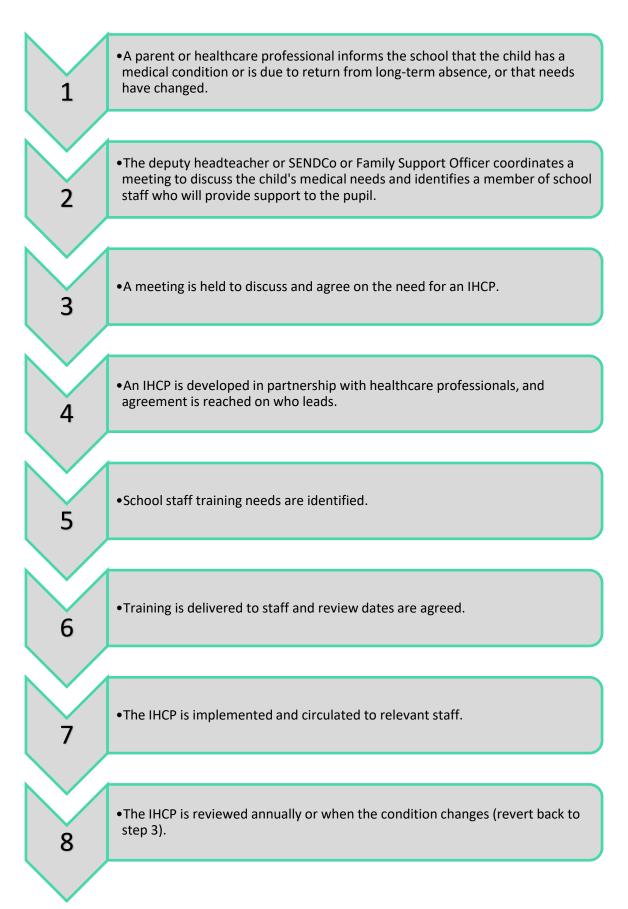

Where possible, AEDs will be used in paediatric mode or with paediatric pads for pupils under the age of eight.

Maintenance checks will be undertaken on AEDs on a monthly basis by the deputy headteacher, who will also keep an up-to-date record of all checks.

## 18. Monitoring and review

This policy is reviewed on an annual basis by the governing body and headteacher. Any changes to this policy will be communicated to all staff, parents and relevant stakeholders. The next scheduled review date for this policy is October 2026.

# F: Model letter inviting parents to contribute to individual healthcare plan development

**Dear Parent** 

#### DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD

Thank you for informing us of your child's medical condition. I enclose a copy of the school's policy for supporting pupils at school with medical conditions for your information.

A central requirement of the policy is for an individual healthcare plan to be prepared, setting out what support the each pupil needs and how this will be provided. Individual healthcare plans are developed in partnership between the school, parents, pupils, and the relevant healthcare professional who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom. Although individual healthcare plans are likely to be helpful in the majority of cases, it is possible that not all children will require one. We will need to make judgements about how your child's medical condition impacts on their ability to participate fully in school life, and the level of detail within plans will depend on the complexity of their condition and the degree of support needed.

A meeting to start the process of developing your child's individual health care plan has been scheduled for xx/xx/xx. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend. The meeting will involve [the following people]. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist and provide any other evidence you would like us to consider at the meeting as soon as possible.

If you are unable to attend, it would be helpful if you could complete the attached individual healthcare plan template and return it, together with any relevant evidence, for consideration at the meeting. I [or another member of staff involved in plan development or pupil support] would be happy for you contact me [them] by email or to speak by phone if this would be helpful.

Yours sincerely

# To be stored by the phone in the school office

Request an ambulance - dial 999, ask for an ambulance and be ready with the information below.

Speak clearly and slowly and be ready to repeat information if asked.

- The telephone number: 01429 288291
- Your name.
- Your location as follows: Throston Primary School, Flint Walk, Hartlepool.
- The postcode: TS26 0TJ.
- The exact location of the individual within the school.
- The name of the individual and a brief description of their symptoms.
- The best entrance to use and where the crew will be met and taken to the individual.
